EDUCATION

Higher School of Economics, Faculty of Computer Science	September 2018 - July 2022
Bachelor of Science in Software Engineering	*Moscow, Russia*

Graduate Projects: Business Processes Automation App Using BPM Technologies

GPA: 7.57/10

EXPERIENCE

Yandex	September 2023 - Present
Software Developer	*Belgrade*

· Expanded Responsibilities: Took on larger roles in multiple projects within the Yandex Market B2B team.
· Increased Merchant Onboarding: Boosted success rate from 65% to 85–90%, adding 500 partners weekly without compromising order quality.
· Optimized Moderation: Cut inspection times by 90% and reduced costs, accelerating onboarding and improving efficiency.
· Reduced Merchandise Outflow: Implemented measures that added 0.5% to GMV growth.
· Enhanced System Stability: Fixed critical bugs, added monitoring/logging, and refactored code—leading to more reliable, high-performing services.

Yandex	April 2021 - September 2023
Software Developer	*Moscow*

· Enhanced Yandex Market B2B Services: Developed and implemented features to improve service quality for customers and merchants.
· Maintained & Improved Microservices: Ensured reliability and performance across various services.
· Integrated Text Checking: Implemented compliance and quality controls in customer–merchant communication channels.
· Modernized Chat Services: Created, deployed, and coded a new chat system to replace outdated infrastructure, ensuring more reliable interactions.
